Product Description

Safety Features Automatic Shut-off Mini Fuel Station C1 White

Product Description:

The Mini Fuel Station is capable of dispensing fuel at a flow rate of 40-60L per minute. This makes it a great option for businesses that need to quickly and efficiently dispense fuel to their customers or employees. Whether you are running a construction site, a fleet of vehicles, or a farm, this mini fuel station will help you get the job done quickly and efficiently.

This mini fuel station comes in a sleek and stylish white color that will complement any environment. Its compact and portable design makes it easy to move around and set up in different locations. Whether you need to fuel up your vehicles or equipment in the field or at a remote job site, this mini fuel station is the perfect choice.

The Mini Fuel Station is powered by electricity, which makes it easy to use and operate. It comes with all the necessary components and accessories, including a hose, nozzle, and pump, to provide a complete fueling solution. The electric power source ensures that the fuel mobile dispenser is always ready to use and can be easily recharged when needed.

When it comes to safety and reliability, the Mini Fuel Station is UL listed and CSA certified. These certifications ensure that the mini fuel station meets the highest standards of quality and safety. You can trust this fuel mobile dispenser to provide safe and reliable fueling for your business.

In summary, the Mini Fuel Station is a compact and portable fuel mobile dispenser that is perfect for businesses that need to quickly and efficiently dispense fuel to their customers or employees. Made from high-quality plastic, this mini fuel station is designed to provide long-lasting durability and reliable performance. It has a flow rate of 40-60L per minute, is white in color, powered by electricity, and comes with UL and CSA certifications. Get the Mini Fuel Station today and experience the convenience and efficiency of a portable fueling solution.

Applications:

One of the primary applications for the Virette C1 is as a mobile gas station. With its compact size and easy maneuverability, it can be used in a variety of settings, including construction sites, mining operations, and agricultural settings. The mini gas station can also be used for emergency situations, such as during natural disasters or power outages when access to fuel is limited.

Another common application for the Virette C1 is in the transportation industry. The mini fuel station can be used to fuel a variety of vehicles, including cars, trucks, and buses. This makes it a great choice for businesses looking to save money on fuel costs and reduce their carbon footprint.

The Virette C1 Mini Fuel Station is also ideal for new energy applications. It can be used to fuel electric vehicles and other alternative fuel vehicles, making it a great choice for businesses and individuals who are looking to reduce their environmental impact.

Additionally, the Virette C1 Mini Fuel Station is designed with safety in mind. It features overfill protection and automatic shut-off to prevent spills and other accidents. The mini gas station is also UL listed and CSA certified, ensuring that it meets the highest safety standards.

Overall, the Virette C1 Mini Fuel Station is a versatile and cost-effective solution for anyone who needs access to fuel in a variety of settings. With its compact size, easy maneuverability, and safety features, it is the perfect choice for mobile gas station needs.

Delivery of the Virette C1 Mini Fuel Station typically takes 20 days from the time of purchase. The product is made in China and has a voltage of 220V. The hose length is 6 feet, making it easy to fuel a variety of vehicles. The price of the Virette C1 Mini Fuel Station ranges from 1000-5000USD, making it an affordable option for businesses and individuals alike.

Customization:
