Product Description

ATEX Certified Flow Meter with English Interface and 7-Digit LCD Display

Product Description:

The Fuel Unloading Flow Meter has a Rate range of 8-80M³ / H (130-1300L / Min), making it ideal for measuring the flow of fuel in bulk delivery operations. The high level of accuracy and repeatability of the Fuel Unloading Flow Meter ensures that precise measurements are obtained every time. The repeatability of the Fuel Unloading Flow Meter is $\pm 0.02\%$, providing consistent and reliable results. The Fuel Unloading Flow Meter can operate in a wide range of temperatures, with an Ambient Temperature range of -30 ~60 . This makes it suitable for use in a variety of environments, including extreme cold and hot conditions. The durable construction of the Fuel Unloading Flow Meter ensures that it can withstand the rigors of daily use and will provide accurate and reliable performance for years to come.
